

Magnetic PVC 600 μ

Magnetic PVC 600 μ is a printable magnetic film with a good holding strength on iron/steel surfaces. The matte PVC imaging surface makes stunning colourful graphics possible. The graphics can be changed easily and can be used time after time saving labour costs, transport costs and the environment.

Compatibility overview

Compatible with (Eco)Solvent and UV-cure inks.

Water
based

(Eco)
solvent

Latex

UV-cure

Physical characteristics

- Base material: Flexible magnet
- Surface: Matte
- Print side: PVC
- Thickness: 600 μ
- Magnetic force: 22g/cm²
- Weight: 1930g/m²

Features

- Stable and flexible base
- Adheres to iron/steel
- Easy to re-position
- Indoor and static outdoor use
- Can be installed by untrained personnel
- Reduces the life-cycle cost for signage

Applications

- Interior decoration
- Indoor retail advertising
- Trade show graphics

Shelf life and environment aspects

The shelf life of this media is 1 year under normal conditions (10°C – 35°C at a relative humidity 30% - 75%). Higher humidity and/or temperature can affect the product performance. Always store the media in a dark place in its original packaging.

We strongly recommend to read the Sentec support document on Magnetic and Ferro coated media.

Important:

Before using the media the user must examine the suitability of the media for each application. We shall not assume liability for non-performance of the media. Specifications are subject to change without notice.
